ADVANCE STEEL

Advance Steel enhances collaboration between engineers and detailers, streamlining BIM workflows from design to fabrication and reducing rework through improved coordination and clarity.

Parametric steel connections

Model more quickly, efficiently, and accurately with a customizable library of ready-to-use steel connections.

Sheet metal

Create 3D folded elements of any sheet metal shape faster.

Design validation

Check for compliance and validate steel-connections against AISC standards.

Steel shop drawings

Automatically generate detailed and annotated fabrication-ready drawing sets.

Bills of Materials

Automatically generate BOMs from modeled element data for use in spreadsheets and reporting.
