NAVISWORKS MANAGE

Navisworks is a BIM coordination tool that unifies design and construction data, helping teams visualize models, detect clashes early, and stay connected through Autodesk Construction Cloud integration.

Clash Detection

Audit, inspect, and report interferences in a 3D project model.

4D Model simulation

Animate model objects, create schedules from project models, and import schedules from external project management tools.

Measurement tools

Quickly measure between points using face, snapping, axis locking, and quick zoom.

Cloud rendering

Create renders for whole-project models you can store and share in the cloud.

Quantification takeoff

Measure lines, areas, and counts with 2D and 3D takeoff,
