

AUTODESK VAULT

Product data management (PDM) software integrates with Autodesk design tools and other CAD systems to keep everyone working from a central source of organized data.

Use Autodesk Vault to increase collaboration and streamline workflows across.

Direct CAD Integration

Vault integrates with CAD software through built-in add-ins, allowing file check-in /check-out, revision control, and metadata tracking all directly within your CAD interface.

Concurrent Design

Enable multiple users to work on the same project simultaneously, with safeguards to prevent conflicts and ensure data consistency.

Version Control & Lifecycle Management

Automatically track version history, manage file states (e.g., WIP, Released), and structure approval workflows.

(BOM) Management

Extract comprehensive BOMs from CAD models and manage them directly in Vault, improving accuracy and traceability.

Web & Remote Access

Access Vault from web browsers or via mobile apps. Vault Professional adds Vault Gateway, enabling secure remote connections without a VPN.
